 Must Supply Email Address
 See Reverse for Optional
 USB Flash Drive

File Format Notes:

Files are delivered as high quality Jpeg files
 unless the TIFF option is chosen.

TIFF Pixel Dimensions may be slightly larger
 than standard Jpeg scans.

We believe there will always be demand for traditional silver gelatin prints and we are passionate about making the highest quality black and white prints. ILFORD PHOTO has 130 years experience of producing the best black and white photographic products, a heritage we are extremely proud of.

We process all types of Black and White 35mm, 120, including non-ILFORD films. Develop and Print turnaround is normally 2-4 working days in the lab.

We also offer a large format B&W developing service, see ilfordlab-us.com for more information. Our film processors are strictly controlled and the black and white machines use ILFORD chemistry. Each film is processed with a unique development time to obtain optimum contrast and density.

We offer a range of process and print services including color film – C-41 and E-6.
